

I am stongly opposed to any copy protection scheme forced on users. I have purchased expensive HDTV equipment that is NOT compatible with such flags and should not be forced to bear the burden of spending more money to line more pockets of greedy media companies. This attempt at hijacking HDTV by keeping users from recording or time shifting over the air broadcasts is not consistent with the "fair use" concepts that the Supreme Court ruled on in the "beta max" video recording case. Please don't bow to the MPAA's strong arm tactics. Thanks
